2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

The accompanying condensed consolidated financial statements are prepared in accordance with generally accepted accounting principles in the United States of America (“US GAAP”).

The Company has adopted its fiscal year-end to be December 31.

Basis of consolidation

The condensed consolidated financial statements include the accounts of the Company, its subsidiaries and its VIEs in which the Company is the primary beneficiary. All inter-company accounts and transactions have been eliminated upon consolidation.

Use of estimates

Management uses estimates and assumptions in preparing these financial statements in accordance with US GAAP. Those estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities in the balance sheets, and the reported revenue and expenses during the periods reported. Actual results may differ from these estimates.

Revenue recognition

In accordance with Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 605, “*Revenue Recognition*”, the Company recognizes revenue from sales of goods when the following four revenue criteria are met: (1) persuasive evidence of an arrangement exists; (2) delivery has occurred; (3) selling price is fixed or determinable; and (4) collectability is reasonably assured.

Revenue from supplies of beauty products is recognized when title and risk of loss are transferred and there are no continuing obligations to the customer. Title and the risks and rewards of ownership transfer to and accepted by the customer when the products are collected by the customer at the Company’s office. Revenue is recorded net of sales discounts, returns, allowances, and other adjustments that are based upon management’s best estimates and historical experience and are provided for in the same period as the related revenues are recorded. Based on limited operating history, management estimates that there was no sales return for the period reported.

Cost of revenue

Cost of revenue includes the purchase cost of retail goods for re-sale to customers and packing materials (such as boxes). It excludes purchasing and receiving costs, inspection costs, warehousing costs, internal transfer costs and other costs of distribution network in cost of revenues.

Shipping and handling fees

Shipping and handling fees, if billed to customers, are included in revenue. Shipping and handling fees associated with inbound and outbound freight are expensed as incurred and included in selling and distribution expenses. Shipping and handling fees are expensed as incurred for the nine months ended September 30, 2018 were \$2,555, while for the nine months ended September 30, 2017 were \$2,411.

DSWISS, INC.
NOTES TO CONDENSED FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2018
(Currency expressed in United States Dollars (“US\$”), except for number of shares)
(UNAUDITED)

Selling and distribution expenses

Selling and distribution expenses are primarily comprised of travelling and accommodation, transportation fees such as petrol, toll and parking and shipping and handling fees.

Cash and cash equivalents

The Company consider all highly liquid instruments with a maturity of three months or less at the time of issuance to be cash equivalent.

Inventories

Inventories consisting of products available for sell, are stated at the lower of cost or market value. Cost of inventory is determined using the first-in, first-out (FIFO) method. Inventory reserve is recorded to write down the cost of inventory to the estimated market value due to slow-moving merchandise and damaged goods, which is dependent upon factors such as historical and forecasted consumer demand, and promotional environment. The Company takes ownership, risks and rewards of the products purchased. Write downs are recorded in cost of revenues in the Condensed Consolidated Statements of Operations and Comprehensive Income.

Property and equipment

Property and equipment are stated at cost less accumulated depreciation and impairment. Depreciation of plant, equipment and software are calculated on the straight-line method over their estimated useful lives or lease terms generally as follows:

Classification	Estimated useful lives
Computer and software	5 years
Furniture and fittings	5 years
Office equipment	10 years
Motor vehicle	5 years
Renovation	5 years

Expenditures for maintenance and repairs are expensed as incurred.

Intangible assets

Intangible assets are stated at cost less accumulated amortization. Intangible assets represented the registration costs of trademarks in Hong Kong, China, and Malaysia, which are amortized on a straight-line basis over a useful life of five years.

The Company follows ASC Topic 350 in accounting for intangible assets, which requires impairment losses to be recorded when indicators of impairment are present and the undiscounted cash flows estimated to be generated by the assets are less than the assets’ carrying amounts. There is no impairment losses recorded on intangible assets for the nine months ended September 30, 2018.

Income taxes

Income taxes are determined in accordance with the provisions of ASC Topic 740, “*Income Taxes*” (“ASC Topic 740”). Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted income tax rates expected to apply to taxable income in the periods in which those temporary differences are expected to be recovered or settled. Any effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

ASC 740 prescribes a comprehensive model for how companies should recognize, measure, present, and disclose in their financial statements uncertain tax positions taken or expected to be taken on a tax return. Under ASC 740, tax positions must initially be recognized in the financial statements when it is more likely than not the position will be sustained upon examination by the tax authorities. Such tax positions must initially and subsequently be measured as the largest amount of tax benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with the tax authority assuming full knowledge of the position and relevant facts.

The Company conducts major businesses in Malaysia and Hong Kong, and is expanding to China and Thailand. The Company is subject to tax in these jurisdiction. As a result of its business activities, the Company will file tax returns that are subject to examination by the foreign tax authority.

Net income/(loss) per share

The Company calculates net income/(loss) per share in accordance with ASC Topic 260, “*Earnings per Share*.” Basic income/(loss) per share is computed by dividing the net income/(loss) by the weighted-average number of common shares outstanding during the period. Diluted income per share is computed similar to basic income/(loss) per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common stock equivalents had been issued and if the additional common shares were dilutive.

Foreign currencies translation

Transactions denominated in currencies other than the functional currency are translated into the functional currency at the exchange rates prevailing at the dates of the transaction. Monetary assets and liabilities denominated in currencies other than the functional currency are translated into the functional currency using the applicable exchange rates at the balance sheet dates. The resulting exchange differences are recorded in the Condensed Consolidated Statements of Operations and Comprehensive Income.

The reporting currency of the Company is United States Dollars (“US\$”) and the accompanying financial statements have been expressed in US\$. In addition, the Company’s subsidiaries and VIEs in Malaysia, Hong Kong, China and Thailand maintains their books and record in their local currency, Ringgits Malaysia (“MYR”), Hong Kong Dollars (“HK\$”), Chinese Renminbi (“RMB”) and Thai Baht (“THB”) respectively, which is functional currency as being the primary currency of the economic environment in which the entity operates.

In general, for consolidation purposes, assets and liabilities of its subsidiaries whose functional currency is not US\$ are translated into US\$, in accordance with ASC Topic 830-30, “*Translation of Financial Statement*”, using the exchange rate on the balance sheet date. Revenues and expenses are translated at average rates prevailing during the period. The gains and losses resulting from translation of financial statements of foreign subsidiary are recorded as a separate component of accumulated other comprehensive income within the statements of stockholders’ equity.

Translation of amounts from MYR into US\$1, HK\$ into US\$1, RMB into US\$1 and THB into US\$1 has been made at the following exchange rates for the respective periods:

	As of and for the nine months ended

Fair value of financial instruments:

The carrying value of the Company’s financial instruments: cash and cash equivalents, trade receivables, deposits, trade payable, other payables, and accounts payable approximate at their fair values because of the short-term nature of these financial instruments.

The Company also follows the guidance of the ASC Topic 820-10, “*Fair Value Measurements and Disclosures*” (“ASC 820-10”), with respect to financial assets and liabilities that are measured at fair value. ASC 820-10 establishes a three-tier fair value hierarchy that prioritizes the inputs used in measuring fair value as follows:

Level 1 : Observable inputs such as quoted prices in active markets;

Level 2 : Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and

Level 3 : Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

Segment reporting

ASC Topic 280, “*Segment Reporting*” establishes standards for reporting information about operating segments on a basis consistent with the Company’s internal organization structure as well as information about geographical areas, business segments and major customers in financial statements. For the nine months ended September 30, 2018, the Company operates in four reportable operating segment in Malaysia, Thailand, China and Hong Kong.

Recent accounting pronouncements

In February 2016, the Financial Accounting Standards Board (the “FASB”) issued Accounting Standards Update (“ASU”) No. 2016-02, Leases (Topic 842). Under the new guidance, lessees will be required recognize the following for all leases (with the exception of short-term leases) at the commencement date: 1) A lease liability, which is a lessee’s obligation to make lease payments arising from a lease, measured on a discounted basis; and 2) A right-of-use asset, which is an asset that represents the lessee’s right to use, or control the use of, a specified asset for the lease term. The new lease guidance simplified the accounting for sale and leaseback transactions primarily because lessees must recognize lease assets and lease liabilities. Lessees will no longer be provided with a source of off-balance sheet financing. The amendments in this ASU are effective for fiscal years beginning after December 15, 2019, including interim periods within those years. The Company is evaluating this ASU and has not determined the effect of this standard on its ongoing financial reporting.

The Company has reviewed all recently issued, but not yet effective, accounting pronouncements and do not believe the future adoption of any such pronouncements may be expected to cause a material impact on its financial condition or the results of its operations.

At this time we operate exclusively online through our website: <http://www.dswissbeauty.com/>

Our company continuously strives to improve the already high standard of our goods and services through ongoing research and market development. We are going to penetrate into South East Asia markets through the recruitment of distributors and via the social media like Facebook and Instagram. We foresee to spend a substantial amount in marketing and advertising in the coming year. At DSwiss we are determined to bring new products to markets that we have not yet explored.

Products which meet the definition of a medicinal scope need to be registered with the Drug Control Authority (DCA), Ministry of Health Malaysia. Manufacturing, marketing, importation and the sale of unregistered products is a violation of the Drug Control Regulations and Cosmetics Act 1984 of Malaysia and enforcement action can be taken.

Among the products offered by DSwiss, “Coffee Plus”, “Kiwi Cell Detox” and “Triple Stem Cell” are not controlled by the DCA since the medicinal component of the products is no more than 20%.

For the remaining products offered by DSwiss, “Silk Mask”, “Coffee Slimming Scrub” and “Peppermint Slimming Gel” are classified as drug and cosmetic items and need to be registered with the DCA. Our expected growth is planned to occur primarily through the implementation of our social media marketing strategy. DSwiss already has a strong relationship with social media (eg. Facebook, Instagram and Wechat). The global presence social media has helped provide to us has been an invaluable resource, and as we continue to expand our business operations and spread our brand awareness we intend to primarily utilize social media to reach our customers. The benefits of social media are countless, but perhaps the most imperative to our future success is our ability to connect with customers directly, to receive their feedback almost instantaneously. On that note, the feedback we have received from our clients has been overwhelmingly positive, which has helped us to create a robust brand image.

While DSwiss has been focused almost exclusively upon pursuing operations within Asia, we do have plans to expand outward and become a household name across the world. Our strategy to do so going forward is by forming partnerships with local companies in various countries that may be willing to stock our products or promote them to their own customers. We believe that by forging strategic relationships and partnerships we can expand our operations across the globe at a greater pace and with greater certainty than we would if we tried to expand on our own.

For the Three and Nine Months Ended September 30, 2018 and September 30, 2017.

For the three and nine months ended September 30, 2018, we generated a revenue of \$16,254 and \$168,442 respectively, while for the three and nine months ended September 30, 2017 we realized revenues in the amount of \$42,367 and \$135,433 respectively. We suffered gross losses for the three ended September 30, 2018 amounted to \$17,867. We attribute the gross losses suffered for this period was mainly due to the increase in cost of revenue as compare to the revenue obtained. However, we managed to generate gross profits of \$29,973 for nine months ended September 30, 2018, which still resulted lower than \$43,249 and \$112,727 for the three and nine months ended September 30, 2017 respectively. We attribute the increase in revenue and decrease of gross profit due to higher cost of revenue in 2018. We believe that in order to improve the gross profit margin, we must look for alternative suppliers of services and material to reduce the cost or retain and attract more customers in the future by increasing our marketing efforts and or develop new products.

*Our gross margins may not be comparable to those of other entities, since some entities include all the costs related to their distribution network in cost of revenue. Our cost of revenue includes only the purchase cost of products and packing materials, and does not include any allocation of inbound freight charges, purchasing and receiving costs, inspection costs, warehousing costs, internal transfer costs, and the other costs associated with the distribution network.

Our net losses for the three and nine months ended September 30, 2018 were \$114,497 and \$286,247 respectively, while for the three and nine months ended September 30, 2017 were \$69,219 and \$206,374 respectively. We attribute this increase due to additional cost incurred to increase product sales and market share.

The introduction of Malaysia Goods & Services Tax (GST) is still has effect on the selling price and hence the revenue. Malaysia Goods & Services Tax of 6% was implemented on April 1, 2015. It has therefore been the primary cause as the resultant of the total increase of selling price on the products that are offered by the Company. However, Malaysia Goods & Services Tax of 6% has been reduced to 0% from June 1, 2018 until the reintroduction of Sales and Services Tax that was implemented on September 1, 2018.

The cost of sales also increased because of the increase in revenue.

The increases in general and administrative expenses are a result of advertising and compliance costs as a public company.

Liquidity and Capital Resources

For the nine months ended September 30, 2018, we had cash and cash equivalents of \$236,458. We have negative operating cash flows and our working capital has been and will continue to be significant. As a result, we depend substantially on our previous financing activities to provide us with the liquidity and capital resources we need to meet our working capital requirements and to make capital investments in connection with ongoing operations. The Company expects its current capital resources to meet our basic operating requirements for approximately twelve months.

Operating Activities

For the nine months ended September 30, 2018, net cash used in operating activities was \$219,737, compared to net cash used of \$230,912 in the prior year. The operating cash flow performance primarily reflects the decrease in trade payable, increase in prepayment deposits, resulted net loss as well as depreciation and amortization compared to the prior year.

Investing Activities

For the nine months ended September 30, 2018, net cash used in investing activities was \$64,456, reflecting the cost in purchase of property, plant and equipment and proceed from disposal of property, plant and equipment. For the nine months ended September 30, 2017, net cash used in investing activities was \$756, reflecting the cost in register of trademarks.

Financing Activities

For the nine months ended September 30, 2018, net cash provided by financing activities was \$32,251 resulted from the proceeds from bank loans. For the nine months ended September 30, 2017, net cash decreased by finance activities was \$6,262 resulted from hire purchase financing and a conversion of notes payable to share capital amounted to \$638,400.

Capital Expenditures

Our capital expenditures primarily relate to the acquisition of property and equipment. Capital expenditures of \$80,373 have been incurred for the nine months periods ended September 30, 2018.

Credit Facilities

We have credit access to as the Company purchased a motor vehicle under a finance lease agreement with the effective interest rate of 2.38% per annum, due through June, 2025, with principal and interest payable monthly.

Contractual Obligations, Commitments and Contingencies

We currently have a lease agreement in place with respect to purchase a motor vehicle in Malaysia to commence our business operations.

Off-balance Sheet Arrangements

We have no significant off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to our stockholders as of September 30, 2018.

Recent accounting pronouncements

In February 2016, the Financial Accounting Standards Board (the “FASB”) issued Accounting Standards Update (“ASU”) No. 2016-02, Leases (Topic 842). Under the new guidance, lessees will be required recognize the following for all leases (with the exception of short-term leases) at the commencement date: 1) A lease liability, which is a lessee’s obligation to make lease payments arising from a lease, measured on a discounted basis; and 2) A right-of-use asset, which is an asset that represents the lessee’s right to use, or control the use of, a specified asset for the lease term. The new lease guidance simplified the accounting for sale and leaseback transactions primarily because lessees must recognize lease assets and lease liabilities. Lessees will no longer be provided with a source of off-balance sheet financing. The amendments in this ASU are effective for fiscal years beginning after December 15, 2019, including interim periods within those years. The Company is evaluating this ASU and has not determined the effect of this standard on its ongoing financial reporting.

The Company has reviewed all recently issued, but not yet effective, accounting pronouncements and do not believe the future adoption of any such pronouncements may be expected to cause a material impact on its financial condition or the results of its operations

VIE STRUCTURE AND ARRANGEMENTS

On June 27, 2016, DSwiss (HK) Limited (“DSHK”) entered into a Management Services Agreement (the “Management Services Agreement I”) which entitles DSHK to substantially entitled to all of the economic benefits of DSwiss Biotech Sdn Bhd (“DSBT”) in consideration of services provided by DSHK to DSBT. Pursuant to the Management Services Agreement I, DSHK has the exclusive right to provide to DSBT management, financial and other services related to the operation of DSBT’s business, and DSBT is required to take all commercially reasonable efforts to permit and facilitate the provision of the services provided by DSHK. As compensation for providing the services, DSHK is entitled to receive a fee from DSBT, upon demand, equal to 100% of the annual net profits of DSBT during the term of the Management Services Agreement I. Item 3 Quantitative and Qualitative Disclosures About Market Risk.

As a “smaller reporting company” as defined by Item 10 of Regulation S-K, the Company is not required to provide information required by this Item.

Item 4 Controls and Procedures.

Evaluation of Disclosure Controls and Procedures:

We carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of September 30, 2018. This evaluation was carried out under the supervision and with the participation of our Chief Executive Officer and our Chief Financial Officer. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of September 30, 2018, our disclosure controls and procedures were not effective due to the presence of material weaknesses in internal control over financial reporting.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company’s annual or interim financial statements will not be prevented or detected on a timely basis. Management has identified the following material weaknesses which have caused management to conclude that, as of September 30, 2018, our disclosure controls and procedures were not effective: (i) inadequate segregation of duties and effective risk assessment; and (ii) insufficient written policies and procedures for accounting and financial reporting with respect to the requirements and application of both US GAAP and SEC guidelines.

Changes in Internal Control over Financial Reporting:

There were no changes in our internal control over financial reporting during the quarter ended September 30, 2018, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
